

Sint-Niklaas, 3 December 2012

CERTIFICATE OF CONFORMITY

We, ITE n.v. - Europark Oost 24 - 9100 Sint-Niklaas - Belgium,
hereby declare that our ROP-06 oil extractor is manufactured in
accordance with the specifications as shown on the attached page.

Dirk Maes
Technical Director

ROP-06 Oil Extractor

The ROP-06 is a long time favourite among technicians because of its power and durability. It requires just 4 to 15 strokes in a row to create a powerful vacuum. The integrated container (6.5 litres) then neatly captures the oil preventing messy spills. The see-through, calibrated container lets the user know how much oil has been extracted. A built-in float switch automatically stops extraction as soon as capacity is reached. A pour spout facilitates emptying. With the pump housed inside the container, the ROP-06 is a durable, maintenance free unit. Capacity: 6.5 litres (6.87 qts) Height: 635mm (25") Cylindrical Diameter: 159mm (6.25") Tube: 3/8" OD, Length 1040mm (41") Extension Tubes: 3/16" & 1/4" OD Length 890mm (35")
