

Quick and **easy** installation for you
Improved part-load efficiency for
your customers

Robust

solution for you
and your customers

The new Danfoss Universal Scroll Compressors with Intermediate Discharge Valve (IDV) technology are designed not only to serve as quick and easy replacements for most 7½ to 15 ton commercial air conditioning scroll compressors, but also to help your customers improve the part-load efficiency of their systems.

See how tomorrow's solutions are ready today.

Danfoss

IDV Technology

Intermediate Discharge Valves (IDVs) are mechanical valves that improve the part-load efficiency of air conditioning systems.

The new Danfoss scroll range with IDVs is backward compatible with existing Danfoss scrolls to reduce complexity and save time during installation.

¹ Competitor Model Nos. beginning "ZP" may have different footprint, suction, discharge or height compared to Danfoss Model No.

² Control voltage of external motor protection module must be checked before crossing to Danfoss Model No with 24V ac or 115/230V motor protection module. Full range of models (refrigerant, tons, and voltage codes) available. Check Coolselector or visit our Online Datasheet Generator at www.danfoss.com/odsg.
